## Westgold Files Updated Technical Reports

Perth, Western Australia, 20 October 2025: **Westgold Resources Limited (ASX/TSX: WGX or the Company)** advises that it has updated its National Instrument 43-101 – Standards of Disclosure of Mineral Projects (**NI 43-101**) compliant technical reports (**Technical Reports**) titled as follows:

**NI 43-101 Technical Report, Beta Hunt Operation Eastern Goldfields, Western Australia;**

**NI 43-101 Technical Report, Higginsville Operation, Eastern Goldfields, Western Australia;**

**NI 43-101 Technical Report, Meekatharra Gold Operations, Murchison Goldfields, Western Australia;**

**NI 43-101 Technical Report, Fortnum Gold Operations, Bryah Goldfield, Western Australia; and**

**NI 43-101 Technical Report, Cue Gold Operations, Murchison Goldfields, Western Australia.**

The **Technical Reports**, each dated 17 October 2025 and with effective date of 30 June 2025, support the news release of the Company dated 3 September 2025, titled " *2025 Mineral Resource Estimate and Ore Reserves*" (the **Release**).

Under NI 43-101, issuers must file a technical report within 45 days of the date of initial disclosure of, among other things, a new or materially changed Mineral Resource Estimate or a Preliminary Economic Assessment.

Copies of the Technical Reports and the Release are available under the Company's profile on SEDAR+ ([www.sedarplus.ca](http://www.sedarplus.ca)) and on the Company's website (<https://www.westgold.com.au/>).

There are no material differences between the Technical Reports and the information disclosed in the Release.

### Technical Reports and Qualified Persons

The Technical Reports have been prepared in accordance with the requirements of NI 43-101 by Mr Leigh Devlin and Mr Jake Russell, each of whom are Qualified Persons (as defined under NI 43-101). As both Mr Devlin and Mr Russell are employees of the Company, neither is independent for purposes of NI 43-101.

**This announcement is authorised for release by the Board.**
