

ASX Announcement

8 February 2021

FIFO Operations Resume

Westgold Resources Limited (**ASX:WGX**) advises that it has resumed FIFO operations in line with Government directions and guidelines.

The safety and wellbeing of our workforce and community is paramount and Westgold promptly and strictly complied with all statutory advice, required processes and continues to do so.

The changes made during the week of lock down and the logistics of dis-engaging and re-engaging a workforce of more than 900 employees and contractors has resulted in minor production impacts. However, at this stage Westgold believes it is still in a position to achieve the guidance it has provided the market for calendar 2021.
